

Early Journal Content on JSTOR, Free to Anyone in the World

This article is one of nearly 500,000 scholarly works digitized and made freely available to everyone in the world by JSTOR.

Known as the Early Journal Content, this set of works include research articles, news, letters, and other writings published in more than 200 of the oldest leading academic journals. The works date from the mid-seventeenth to the early twentieth centuries.

We encourage people to read and share the Early Journal Content openly and to tell others that this resource exists. People may post this content online or redistribute in any way for non-commercial purposes.

JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact support@jstor.org.

CONTENTS:

<i>Physical Anthropology</i> : GEORGE A. DORSEY.....	109
<i>The Association of American Anatomists</i> : D. S. LAMB.....	120
<i>Classification of Textile and other Useful Fibers of the World</i> : CHARLES RICHARDS DODGE.....	122
<i>Current Notes on Anthropology</i> :—	
<i>Pigmentation of the Skin</i> ; Holmes' <i>Researches in Mexico</i> : D. G. BRINTON	124
<i>Notes on Inorganic Chemistry</i> : J. L. H.....	124
<i>Physical Notes</i> :—	
<i>The 'Dark Light' of M. Le Bon</i> : W. S. F.....	126
<i>Scientific Notes and News</i>	126
<i>University and Educational News</i>	132
<i>Discussion and Correspondence</i> :—	
<i>New Terms in Geology</i> : JOHN C. BRANNER.	
<i>Notes on Some Fossils of the Comanche Series</i> : F. W. CRAGIN. <i>Oysters</i> ; <i>A Review of Ignorance</i> : GEORGE CHAS. BUCHANAN. <i>Cerebral Light</i> : E. W. SCRIPTURE.....	133
<i>Scientific Literature</i> :—	
<i>Schultze's Grundriss der Entwicklungsgeschichte</i> ; C. S. MINOT. <i>Apstein on Das Susswasserplankton</i> : C. A. KOFOID. <i>Geologic Atlas of the United States</i>	139
<i>Scientific Journals</i> :—	
<i>The American Chemical Journal</i> : J. ELLIOTT GILPIN	143
<i>New Books</i>	144

MSS. intended for publication and books, etc., intended for review should be sent to the responsible editor, Prof. J. McKeen Cattell, Garrison-on-Hudson, N. Y.

PHYSICAL ANTHROPOLOGY.*

PHYSICAL anthropology is that branch of the broader field of anthropology which treats of physical man. It has nothing to do with man as a social being; it is not

* A lecture delivered at the Field Columbian Museum, March 20, 1897.

concerned with the products of his hands or of his brain; it deals neither with technology, language, government, law, sociology, folk-lore nor religion; it treats of man as an animal.

We may for the sake of convenience consider four views of the subject. These are:

- (a) the scope of physical anthropology;
- (b) the problems of physical anthropology;
- (c) physical anthropology in its relation to museum exhibition; and (d) the importance or value of physical anthropology.

(a) *The Scope of Physical Anthropology.*

Physical anthropology assumes that man is an animal; is a member of the brute world, and it follows that man is to be studied as other animals are studied. It is then a part of zoology, which has for its study the entire animal world; and in this world man demands the most attention and the closest scrutiny, for he is both the most important and the most widely distributed of all animals. Applying the methods of zoological investigation to man, physical anthropology asks of his ancestry, of the time of his appearance on earth, of his kinds or varieties or species, of the comparative fertility of races, of the fertility of hybrids, of the laws of heredity and descent, and of the nature and influence of food, climate and environment upon man, and finally of man's relation to other animals.
